Published Order

Respondent:	Christopher Jones
Title:	Psychologist
Case ID:	2026-143 and 2026-148
Date of Effect:	November 24, 2026

Notice of Order

On November 24, 2026, the Deputy Registrar of the College of Health and Care Professionals of BC ("College") made the Summary Protection Order ("Order") below relating to the Respondent.

Reasons for Order

On August 11, 2026, the College of Health and Care Professionals of BC ("CHCPBC") received a regulatory complaint from a member of the public. The complaint relates to the content and timeliness of a formal assessment prepared by the Respondent.

Following a review of the complaint, the Deputy Registrar identified further concerns and made an additional regulatory complaint regarding the Respondent's alleged failure to comply with an Undertaking and Consent Agreement he had signed with the College.

On review of both complaints, the Investigation Committee has reasonable grounds to believe that the Respondent's continued practice of psychology may present a significant risk of harm to the public.

To ensure public safety while the complaint is under investigation, the Deputy Registrar, on direction from the Investigation Committee, has made a summary protection order that imposes limits and conditions on the Respondent's practice authority.

This order is temporary and does not imply any wrongdoing on the Respondent's part. It may be varied or terminated as new information arises during the investigation or once the matter is resolved.

The order was made without the Respondent's consent as permitted under the HPOA. A copy of the order can be found below and will be monitored by CHCPBC for compliance.

PROFESSIONALS OF BC

Summary Protection Order

Made by the Deputy Registrar of the College of Health and Care Professionals of BC
("**CHCPBC**")
at the Direction of the Investigation Committee ("**Committee**")
pursuant to s. 259(1) of the *Health Professions and Occupations Act* ("**HPOA**")

In the matter of a regulatory complaint ("**Complaint**")
concerning Dr. Christopher Jones, Psychologist ("**Respondent**")

CASE ID: 2026-143 and 2026-148

Important Note

The purpose of this order is to address interim public safety concerns based solely on the nature of the allegations in the Complaint. It is a temporary, precautionary measure - not a disciplinary finding. The Complaint is currently under investigation and the allegations are unproven.

Order

Pursuant to the Decision of the Investigation Committee dated November 20, 2026 ("**Decision**"), the Deputy Registrar makes this summary protection order to impose limits and conditions on the Respondent's practice authority as set out below (HPOA s. 259(1)(b)).

Particulars

a. The Respondent must not accept or commence any new psychological or other formal assessment unless the assessment has first been approved in writing by a supervisor approved by the Deputy Registrar (the "Approved Supervisor").

b. The Respondent must stop any psychological or other formal assessments already in progress until the Approved Supervisor has been secured and has oversight of the Respondent's practice.

c. For clarity, the Approved Supervisor can be the current supervisor engaged by the Respondent or a different supervisor approved by the Registrar.

d. The Respondent must conduct all psychological or other formal assessments under the direct supervision of the Approved Supervisor.

e. For clarity, "direct supervision" means supervision that complies with the requirements set out in paragraph (f) below.

f. Prior to accepting a new psychological or other formal assessment, the Respondent must prepare a written service plan for the Approved Supervisor to review in advance that identifies:

    (i) the scope and purpose of the assessment;

(ii) the assessment dates;

(iii) the proposed date to provide the assessment to the Approved Supervisor for approval;

(iv) the proposed date for the Approved Supervisor to provide approval, which must incorporate time should changes be required; and

(v) the deadline for delivery of the written report to the client.

g. The Respondent must not provide any draft or final assessment report to a patient, client, representative, or other third party unless the Approved Supervisor has first reviewed the report and approved its release in writing.

h. The Respondent must not practise in the area of providing psychological or other formal assessments during any period in which an approved supervisor is not available to fulfill the supervision requirements as directed by the Panel and under the supervision plan.

i. The Respondent must pay all costs associated with having a supervisor review and approve all service plans, psychological or other formal assessments, and other related work in order to fulfill the supervision requirements as directed by the Panel and under the supervision plan.

j. During the term of this order, the Respondent must not supervise any interns, including but not limited to practicum students, doctoral residents or provisional psychologists.

For clarity, this order is complementary to, but does not supersede or terminate, the Respondent's current requirements under the Undertaking and Consent Agreement, effective since March 2026.

Duration

This order takes effect on the date it is signed by the Deputy Registrar and will remain in effect until it is superseded by either one of:

1. A decision of the Investigation Committee to vary or terminate the order, pursuant to section 262(1).
2. The decision of the Investigation Committee to dispose of the Complaint, or in the event of a citation, the outcome of any discipline proceeding.

This order is made by the Deputy Registrar on November 24, 2026.
